Why Buy Honeycomb Specialty Shades From Smith+Noble?

6 styles designed for hard-to-cover windows

Made of patented Honeycomb fabric

Custom made to fit your special window

Extensive selection of fabrics and colors

Superior insulation

Dust and stain resistant

Fast delivery

ORDERING CHECKLIST

A CHOOSE Product Style

VertiTrak

Perfect for patio doors and large windows, VertiTrak hardware suspends the Honeycomb fabric from a sleek track along the top – the accordion folds open to stack compactly to the sides. When closed, a concealed magnetic catch holds the shade in place. Hardware is available in white only. Shades can open to the left, right or split draw please specify under Open To on the order form. The maximum width for one-way draw shades is 144". Shades wider than 144" must be ordered split draw. For split draw: Price as two shades at half the total width.

Skylight Shade

These shades offer the best light control option for skylight windows. The energy-efficient, foam-insulated hardware frame fully surrounds and holds the fabric at any angle, allowing the shade to be opened to any position. Skylight poles are available for out-of-reach windows. Shade snaps into side mount brackets for easy installation. Please indicate "flat ceiling" or

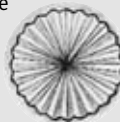

approximate angle at which the shade will be mounted under Notes on the order form. Hardware is available in white only. Please note: Skylight shades are available as inside mount only.

Arch, Circle, & Quarter Circle Shades

These shades feature fanned out Honeycomb fabrics and cannot be opened. Arches and quarter circles are installed with brackets mounted on the flat sides. All shades are held in place by small, clear clips mounted along the perimeter. A full size template* is required on any arch that is not a perfect arch (width equals exactly twice the height). Please note: Arches over 60" wide must be perfect arches. Arch height must be at least 30% of the width, but no more than 50% of width. Circle shades are available in perfect circles only. All Quarter Circles require templates.* Please note: Maximum width for $\frac{3}{4}$ " Horizon Circle shades is 48" and for $\frac{3}{4}$ " Twilight Circle shades is 60". *See price chart for template information.

Angle Top Shade

Angle Top shades have a stationary fanned portion combined with a moveable rectangular portion. The shade will draw up to the beginning of the slope. The draw cord will be on the lower end of the rail. The maximum slope angle is 45 degrees. See price charts for maximum width and heights by fabric type. No shades longer than 84". Be sure to include a full size template* to insure a proper fit. *See price chart for template information.

B CHOOSE Material, Color Name & Number

Refer to the quick reference chart at right to determine which Honeycomb fabric styles are available for each specialty shade style. We suggest you consider light control, privacy, and insulation needs when selecting your fabric options. Refer to your Smith+Noble catalog or our web site, smithnoble.com to make your specific color choice and fabric style. For additional information on each fabric style, refer to your Smith+Noble catalog or smithnoble.com to make your fabric choice.

HONEYCOMB FABRIC	SPECIALTY SHADE AVAILABILITY				
	SKYLIGHT	VERTITRAK	ARCH	CIRCLE & QUARTER CIRCLE	ANGLE TOP
3/8" Horizon Single Cell	X			X	X
3/4" Horizon Single Cell	X	X	X	X	X
1/2" Horizon Twin Cell	X			X	X
3/8" Horizon Ultima Triple Cell	X			X	
3/4" Sheer Single Cell			X	X	
3/4" Semi-Sheer Single Cell			X	X	
3/8" Twilight Single Cell	X			X	X
3/4" Twilight Single Cell	X	X	X	X	X

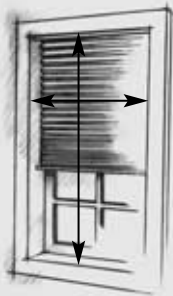

C CHOOSE Upgrades

A Skylight Pole is available for Honeycomb Skylight Shades. You can add this option under the "Upgrades" column on your order form.

D CHOOSE No Charge Options

- VertiTrak: Specify **Left**, **Right**, or **Split** Draw.
- Skylight Shades: Specify "Flat Ceiling" or the approximate angle at which the shade will be mounted under *notes* on the order form.
- Extension Brackets: (VertiTrak only) specify clearance needed under *notes* on the order form.

MEASURE – INSIDE MOUNT

Inside mounted blinds or shades are contained within your window frame. Many people prefer an inside mount because it provides a finished, built-in look without covering the window molding.

For an inside mount, your window's frame depth needs to be the same or greater than the minimum depth required on the chart below.

FRAME DEPTH

If your window frame depth is less than the minimum depth listed above, you will have to use an outside mount. (Outside mount available on VertiTrak only.)

For the face of your product to be flush with the wall, make sure that your window depth is the same or greater than the flush mount depth on the chart below.

FLUSH MOUNT		MINIMUM DEPTH	
	Minimum depth required for product to be flush with window frame		Minimum depth required to inside mount product
3/4"	VertiTrak	1"	1"
2 1/4"	Skylight	1 1/4"	1 1/4"
2 1/2"	Arch, Circle, Quarter Circle 3/4" Fabrics Only	1 1/4"	1 1/4"
1 1/4"	Angle Top 3/4" Single Cell fabrics	1 1/4"	1 1/4"
2 1/2"	Angle Top 3/4" Single Cell fabrics	1 1/4"	1 1/4"

Provide the exact width and height measurements of your window opening. A small deduction will be taken from the measurements you specify to allow for operating clearance.

PRODUCT STYLE	WIDTH (MEASURE LEFT TO RIGHT)		HEIGHT (MEASURE TOP TO BOTTOM)	
	WHERE TO MEASURE	MEASUREMENT TO USE	WHERE TO MEASURE	MEASUREMENT TO USE
VertiTrak	TOP	TOP	LEFT, CENTER & RIGHT	SHORTEST
Skylight	TOP, CENTER & BOTTOM	NARROWEST	LEFT, CENTER & RIGHT	SHORTEST
Arch*	BOTTOM	BOTTOM	CENTER	CENTER
Circle*	CENTER	CENTER	CENTER	CENTER
Quarter Circle*	FLAT HORIZONTAL MOUNTING SURFACE	SAME	FLAT VERTICAL MOUNTING SURFACE	SAME
Angle Top*	SLOPED ANGLE (TOP)	SLOPED ANGLE (TOP)	LONGEST SIDE	LONGEST SIDE

Use this table to determine which width and height measurement to use for your product. *Note: A full size template must be submitted with your order for Quarter Circles, Angle Tops and any Arch that is not a Perfect Arch (width equals exactly twice the height). Arches over 60" wide must be perfect arches. See Arch price list for other limitations. For specific information regarding templates and ordering a template kit see *Template Kit* in the price grids relating to these products.

MEASURE – OUTSIDE MOUNT

VertiTrak Shades

VertiTrak Shades can be mounted on your wall or molding. They're ideal for shallow windows that will not accommodate an inside mount and for maximizing view.

Measure your Window and Overlap

Measure the area you want to cover, including any overlap on the surrounding wall. The chart below provides a guideline that can be modified if you don't have room to add overlap, although you must add at least 2" above the window to allow space for mounting brackets. When you specify outside mount, we will not take any size deductions—your shade will be made to the exact size you specify.

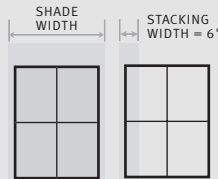

MINIMUM RECOMMENDED OVERLAP CHART

PRODUCT	OVERLAP WIDTH (OUTSIDE MOUNT)	OVERLAP HEIGHT (OUTSIDE MOUNT)
VertiTrak (standard window)	8" (4" EA. SIDE)	2" TOP, 3" BOTTOM
VertiTrak (patio door)	8" (4" EA. SIDE)	2" TOP

Decide on your VertiTrak's Stacking Location

For maximum view, add to your width measurement as specified on the chart below.

VERTITRAK STACKING WIDTH WHEN FULLY DRAWN OPEN (IN INCHES)	
<i>shade width in inches</i> — 24" TO 144"	
Fabric Stack	6"
Fabric Stack (Split Draw)	6" Ea. Side
