

French Doors without Lever

Wood Shutters are a time-honored way to elegantly dress French doors. Unlike shades and blinds, they are firmly affixed at both top and bottom, so they won't swing and sway when your door is opened and closed.

French Doors with Lever

Your French Door Wood Shutters will be custom-built to accommodate special requirements, such as a cutout for lever handles (above).

Track System (for sliding glass doors)

Sliding glass doors are a challenge to cover attractively, due to their large size and the need to be highly functional since they'll be opened and closed so often. Our Wood Shutters fit the bill gorgeously, with the added plus that you can employ the same treatment in your room's other windows. We offer several sliding door solutions, including Bi-Fold construction (shown left) and a track-mounted Bi-Pass system. Your Design Consultant or Installer will recommend which solution is best for your needs.
